PROFESSIONAL SUMMARY

Computer Science student specializing in Cybersecurity with hands-on experience in Python, JavaScript, networking, AI/ML, and security-focused application development. Built and validated a virtualized network environment demonstrating Longest Prefix Match across overlapping /12, /16, /24, and /25 routes with packet-level analysis using Wireshark. Targeting Cybersecurity Analyst/SOC opportunities to apply network security, traffic analysis, security monitoring, defensive controls, and automation.

TECHNICAL SKILLS

Cybersecurity: Network Security, Information Assurance, Security Monitoring, Packet Analysis, Authentication, Threat Detection Fundamentals

Networking: TCP/IP, IP Routing, Longest Prefix Match, Subnetting, Network Topology, Ping, Traceroute

Languages: Python, Java, JavaScript, C/C++, SQL

Web & APIs: HTML5, CSS3, JavaScript, React, Tailwind CSS, REST APIs, OpenAI API

AI/ML: Scikit-learn, Pandas, NumPy, Matplotlib, KNN, Decision Trees, K-Means, PCA

Databases & Tools: MySQL, MongoDB, Git, GitHub, Wireshark, GNS3, VirtualBox, Linux, Arduino IDE

PROJECTS

Longest Prefix Match — Network Demonstration

GNS3, Cisco IOS, VirtualBox, Wireshark, iPerf3 | github.com/Atharva-ark06/LPM-Network-Demonstration

- Configured overlapping /12, /16, /24 and /25 routes in a virtualized topology to demonstrate deterministic route selection by prefix specificity.

AI-Based Automated Interview System

Python, FastAPI, MongoDB Atlas, scikit-learn, NLTK, face-api.js | Academic team project — GM University

- Integrated authentication, automated interview questions, NLP-based answer evaluation, real-time face detection, anti-cheating monitoring and PDF reporting into one application architecture.

Custom C-Minus Compiler Implementation

JavaScript, Regex, CFG, AST, Semantic Analysis, Three-Address Code | github.com/Atharva-ark06/Custom-C-Minus-Compiler-Implementation

- Implemented a multi-phase compiler pipeline covering lexical analysis, parsing, AST generation, semantic analysis, symbol tables and intermediate-code generation.

Ocean AI

HTML, JavaScript, 3D Visualization, APIs, AI Chatbot, Image Analysis | github.com/Atharva-ark06/Ocean-AI

- Built an interactive AI-oriented interface combining 3D visualization, customizable API integration, chatbot interaction and image-analysis workflows.

EDUCATION

B. Tech in Computer Science — Cybersecurity / Information Security | GM University, Davangere | Expected 2028

CERTIFICATIONS & TECHNICAL ACTIVITIES

Fundamentals of Cyber Security • Network Security & Firewall Operations • Digital Essentials — Mastering Everyday Tech Tools • Flipkart SCOA Academy • Code Rush • Hack Kshetra 2.0 • Google Student Ambassador Hackathon-GMU • Introduction to Security Principles in Cloud Computing-Google Cloud Security • Ethical Hacking Capstone Project: Breach, Response, AI-IBM • Microsoft Certified: Cybersecurity Tools and Technologies
